

Drain Unblocking

Written by Administrator

Monday, 10 December 2012 20:43

Qualter Plumbing provide for fast and effective cleaning of drains, pipes and grease traps by using high pressure water jetting. A high pressure hose is fitted with various nozzles which allows jets of water to remove blockages and build ups of debris from your drains. The blockage is removed by the force of the water meaning no chemicals are used in the process. Water jetting is versatile and effective and we have the expertise to completely clear your drains and ensure they don't trouble you again in the future. For more information about drain unblocking and water jetting, please [contact us](#) .
